

> METS 2022 - NEW PRODUCTS

The Amsterdam Mets is our big annual meeting for gathering equipment professionals. This is the moment we choose to reveal our novelties and our latest catalog.

This year, the big news is the launch of our range of KRS reefing furlers.

We can't wait to see you again and show you all this.

See you soon.

Tanguy de LARMINAT

Commercial Director / Managing Director

We will exhibit for the 2nd consecutive year in the French pavilion.

METS - AMSTERDAM - HALL 5 – BOOTH 323
15, 16 & 17 NOVEMBER 2022

Come freely or make an appointment... as long as you come, everything is fine with us!

Our **new 2023 catalog** will be available on the stand but we invite you to use the PDF version present on our website.

This PDF version is always the latest and often more complete than the paper version.

> KRS MANUAL REEFING FURLERS

Some of our customers have been waiting for this reefing furler for 20 years! At last, here it is.

You are certainly wondering what this reefing furler has more than the others?

It's a reefing furler eco-designed to last which breaks certain established codes. The main thing is to put an end to the "racing" or "cruising" versions! We offer a reefing furler all options (elliptical profiles, double lug, removable drum, ...) on all models. It's a reefing furler aesthetic, compact, reinforced, robust, easy to assemble and use thanks to its wide drum (less effort). The plastics are bio-sourced and the mechanisms are reinforced to last.

The reefing furler by Karver! To discover urgently.

First deliveries scheduled for spring 2023.

> KJSK STAYSAIL KIT

DAME
NOMINATED
2022

Each year, we present one or more products to the greatest Mets innovation & design competition : the Dame Award.

This year we have been selected for our **KJSK staysail kit**. This is a set including our now famous KJC 3 jaw high load jammer installed on a support ready to attach to the deck by lashing or universal joint. The support is equipped with 2 flared sheaves to achieve the 3:1 tackle.

The jammer is installed with the flying staysail. Once stowed, the deck is clear.

> KR LOW FRICTION RINGS

In addition to our **KRO open rings** and our **titanium rings**, we offer a range of low friction rings. We still prefer bearing blocks but rings are great tools for so many performance and comfort applications.

> ECO CONCEPT FURLER

We are continuing to develop our range of **Eco Concept furlers**. The large KF1.5, large KF3.0, KF4.5 and KF6.0 models are now available. Molded stainless steel forks are more durable and less impactful than machined aluminum forks. Replacement of carbon fibers with linen fibers. Use of organic plastics sourced from linen). Think about it before ordering.

> FREE 3D : PRODUCTS FOR 3D PRINTERS

It is a concept more than a product that we also submitted to the votes of the Dame Award jury. On our [website](#), it is now possible to download simple and useful product files for 3D printing for free. The goal is to help and create a small community where everyone can take or drop files. Join us.

> PERFORMANCE... PERFORMANCE... PERFORMANCE

TITANIUM FURLER & HOOK - IMOCA SPECIAL

The quintessential Karver : our new V3 carbon/kevlar furler and the latest version of our KFH external swivel lock, all in titanium version. More compact, lighter, more resistant to allow blind use and at very high speeds. More than 20 sets are on board from the the Route du Rhum 2022 competitors.

If you want to see what a 100% racing and 100% performance dedicated product looks like, come see us.

ADJUSTABLE TACK STRUCTURAL FURLER

For skippers looking for fine tuning and a bit of comfort. This structural furler allows the luff tension of the J2 to be adjusted safely from the cockpit. Rather useful when boats are flying at over 30 knots.

Suffice to say that it only works with an extremely stiff sail.

> THEY MADE KARVER SUCCESS STORY

KARVER WINCHES

If you still haven't tried our new winches, it is time to meet us.

Not having tried these winches is a serious lack if you are a boating professional, if you are a sailor looking for a podium or if you are more simply a boater tired of having to force your winches.

KWH CARBON HANDLES

Whether you change your winches or not, start by changing handle. Here again, we have a unique product on the market : a low-cost carbon handle available in a customizable wood veneer version. In my opinion this can be a great idea for a Christmas gift.

Do not delay ordering if you are thinking of the personalized version... 5 to 6 weeks delay.

> COLLABORATIONS

LOAD SENSORS

Cyclops Marine has modified their Smart Toggles to fit our KF4.5 and KF8.0 furlers.

PERFORMANCE SPIRIT

Performance Spirit is a gathering of 7 French companies who share the same obsession with performance and the same pleasure in customer service.

We are once again exhibiting together at the next Paris boatshow and separately for this Mets edition.
